

WALLS

ROOF

HAUNTED HOUSE INSTRUCTIONS

- 1) Print the pages- walls and roof. Sturdy cardboard can be used or normal paper. To make the house more stable, a cardboard roll can be used inside the tube.
- 2) Color or paint. Add more decorative touches if you wish, the possibilities are endless!
- 3) Cut out the wall and roof- follow the cutting prompt. Roll the rectangle to form a tube and secure with clear sticky tape.
- 4) Fold the circle to form a cone following the prompts. Again, secure with clear sticky tape. The folded piece on the inside of the cone can be secured flat with tape or cut off completely.
- 5) Dab a few drops of liquid glue on the top part of the tube(walls) and place the cone(roof) on top. Keep it there for a few second to make sure it stays in place.
- 6) Leave to dry completely before moving.

TIP: Use a battery operated tea candle inside the tube to make the house glow up at night. Poke a few holes in the windows/roof to let the light out! Now you have a haunted house luminary!
